

Tips and Hints #5
January, 2010

How To Set Up a Google Webmaster Account

Go to www.google.com/webmasters/tools/
Create a Free Google account if you do not have one.
Click on *the right hand side* <create an account now>.
Sign in once you receive it or if you already have one.
Click <add a site> at bottom of the new window. Information is available on the left sidebar.
Type in your URL, <continue>.

Verification is next.

You need to know how to either write metas to your source code or how to transfer files to your server folder.

Once established, read everything Google says.

Sign up for the Webmaster blog and look for YouTube videos!
